

### O<sub>2</sub> sensor

Oxygen sensor for measurement of dissolved oxygen with integrated temperature sensor

**Article-No. 461 4000**

### Properties

- oxygen sensor working with galvanic cell, mounted in robust dipping enclosure
- measuring independent from oncoming flow
- calibration in air or in air saturated water
- long life cycle
- can be positioned directly into waterbodies
- cost-effective
- no defined approaching flow necessary

### Applications

- process control
- wastewater control
- drinking water monitoring
- aquaculture

#### Technical data O<sub>2</sub>

Measuring principle	galvanic cell
Measuring range	0 ... 20 mg/l
Measuring accuracy	+/- 0,2 mg/l
Measuring resolution	0,1 mg/l
Measuring interval	≥1 s
Housing material	PVC
Temperature range	-4°C...+50°C
Weight	0,25 kg
Dimensions	length 130 mm; diameter: 50 mm

#### Technische Daten Temp.

Measuring principle	NTC
Measuring range	-4°C bis +60°C
Measuring accuracy	0,3°C, absolute
Measuring resolution	0,1 °C
Measuring interval	≥ 5 s
